31st May, 2021

Dear Vice Chancellor/Director,

In view of the increasing global demand for cyber security experts, CyberPeace Foundation has collaborated with All India Council for Technical Education (AICTE) and Ministry of Education to train five lakh students in India on cybersecurity skills in one academic year (2021-22) with an objective to address the demand for skilled people in the cybersecurity sector. The AIU is supporting the event. The aim of the programme is also to address the issues that have come up such as cybercrimes, harassment, and abuse with the technological advancements and to build a secure ecosystem of global communities where the internet will become a strength for the youth of the country. Foundation will also focus on researching the problems faced online and developing innovative solutions to address these problems in addition to enabling the youth to expand their knowledge and skills on the internet.

CyberPeace Foundation has initiated "Project eSaksham" with the aim to bridge the gap in digital literacy and cyber security skills through capacity building and outreach activities. A brochure containing the details about the project is attached for ready reference.
