

## About the Department

The Civil Engineering department stands as the cornerstone of the School of Engineering at Gautam Buddha University, Greater Noida. Since its inception in 2010, the department has been instrumental in shaping highly skilled and professional engineers. With a commitment to academic excellence and practical expertise, the department offers a diverse range of programs to meet the demands of the field.

The department administers an undergraduate program namely 4-year B.Tech in Civil Engineering. For those pursuing advanced studies, it provides two specialized 2-year M.Tech courses in areas such as Structural Engineering, Environmental Engineering, Transportation Engineering, Geotechnical and Geo Environmental Engineering and Construction Management. Additionally, the department offers a post-graduate program namely M.Tech in Structural Engineering (Executive) for working professionals. The Department of Civil Engineering excels in research and innovation, which it complements through its academic offerings. The department runs a vibrant Ph.D. programme, which promotes the development of world-class research scholars. The department continually upgrades its infrastructure and laboratory facilities, ensuring that students and researchers have the resources needed to excel and innovate.

Our faculty is a blend of experienced and dynamic educators, dedicated to delivering high-quality education. They are actively engaged in cutting-edge research across various civil engineering domains, consistently publishing their work in reputable journals and conferences. To further enrich the learning experience, the department organizes a variety of programs, including workshops, conferences, faculty development programs, technical training sessions, seminars, and expert lectures. These initiatives facilitate the continuous development of both faculty and students, allowing them to stay abreast of the latest advancements in the field of Civil Engineering.

In addition to classroom learning, the department emphasizes practical exposure. Regular industrial visits are arranged to provide students with hands-on experience and insights into the latest technologies employed in the civil engineering industry. This commitment is bridging theory and practice, ensures that our graduates are well-prepared to meet the challenges of the ever-evolving field of Civil Engineering.
