An Ultimate Destination For Higher Education

About Us

Gautam Buddha University, established by the Uttar Pradesh Act (9) of 2002, commenced its first academic session at its 511 acres lush green campus at Greater Noida in August 2008. The University is fully funded by the New Okhla Industrial Development Authority (NOIDA) and the Greater Noida Industrial Development Authority (GNIDA), the undertakings of the Government of Uttar Pradesh.

The academic programmes offered by the University are recognised by the University Grants Commission of India and various other Statutory Bodies, Councils, whichever are applicable in individual cases.

GAUTAM BUDDHA UNIVERSITY

An Ultimate Destination For Higher Education

VC's Message

University School of Information and Communication Technology (USICT) at Gautam Buddha University stands as a beacon of excellence in Computer Science and Engineering, Information Technology, and Electronics and Communication Engineering. Our dedicated faculty, state-of-the-art infrastructure, and comprehensive academic programs ensure that our students receive an education that fosters innovation, creativity, and critical thinking.

The Corporate Relations Cell (CRC) works tirelessly to enhance student employability across all eight schools of GBU, providing placement assistance, career guidance, and industry engagement opportunities. Within USICT, our placement cell ensures students are well-prepared for the professional world. As we present the Campus Recruitment Program for the 2024-25 batch, we invite you to engage with our talented students, ready to bring fresh perspectives and technical expertise to your organization.

Prof. Ravindra Kumar Sinha
Vice Chancellor

GAUTAM BUDDHA UNIVERSITY

An Ultimate Destination For Higher Education

Dean's Message

Welcome to the 2024-25 placement season for the University School of Information and Communication Technology (USICT) at Gautam Buddha University. Established in 2009, USICT has grown into a hub of excellence with three distinct departments: Computer Science and Engineering, Information Technology, and Electronics and Communication Engineering. Our School is dedicated to nurturing future-ready professionals through a blend of rigorous academic programs and hands-on experience.

Our students are well-prepared to meet the evolving demands of the ICT industry, equipped with both cutting-edge knowledge and strong ethical foundations. We take pride in our alumni, who have excelled in leading global organizations such as Microsoft, HCL, TCS, and Addverb. Their success is a reflection of the quality education and training they received at USICT. We look forward to fostering strong industry partnerships and connecting you with our talented students, who are ready to contribute to your organization's growth and innovation.

Placement Statistics

SOICT's impressive placement record highlights its dedication to producing industry-ready graduates. With a placement rate consistently surpassing the national average, the institute has established strong partnerships with leading companies. This achievement reflects its robust academic curriculum, hands-on training, and focus on professional development, ensuring promising futures for its students. Maintaining high placement rates is especially vital for SOICT, GBU, as a newly established institution, to build trust and credibility among stakeholders. By aligning its curriculum with industry needs, fostering innovation, and nurturing talent, GBU is well-positioned to continue its successful journey of developing skilled professionals who make meaningful contributions to society and drive positive change.

Our institution showcases outstanding placement statistics, with 74% in 2023, 87% in 2022, 83% in 2021 and culminating in an overall placement rate of 72%. These numbers underscore our dedication to nurturing highly skilled professionals, making us a top choice for recruiters.

Each department blends theoretical knowledge with practical skills. The CSE department excels in software development, Artificial Intelligence, data science, and cybersecurity. The ECE department equips students for careers in telecommunications and semiconductor design, while the IT department offers a comprehensive IT engineering education.

Placement Procedure

01. FORMAL INVITATIONS

Training and Placement Cell (TnP) USICT, GBU sends formal invitation and relevant information regarding Campus Placement to the companies

02. JOB NOTIFICATION FORM

Companies can register by filling up the Internship Notification form or Job Notification Form. Any company if interested in organizing a Pre-Placement Talk (PPT) can share their request along with relevant details.

03. PLACEMENT SCHEDULE

The TnP cell, USICT decides the final placement schedule of tests with companies after mutual discussion and consent. All the appropriate details regarding the company and opportunity offered is shared with students

04. RECRUITMENT PROCESS

Interested students can apply for the recruitment process through the online portal and thereafter their resumes are shared with the company. Recruiters can conduct any kind of test or shortlist on the basis of resume before moving forward with the interviews.

05. SELECTED CANDIDATES

The company can interview the shortlisted students and finally submit the list of selected students.

GBU to get Rs 100 crore for AI centre and infra development

TNN | Feb 9, 2024, 11:21 AM IST

NOIDA: Gautam Buddha University will receive a one-time grant of Rs 100 crore from the state govt as mentioned under the recent UP budget. The vice chancellor of the university said Rs 50 crore will be assigned to develop a new artificial intelligence-based Centre of Excellence, while the remaining amount will be used for infrastructural development on the university campus.

"This is the first time that the state has directly funded the university," said Ravindra Kamar Sinha, VC of GBU.

The centre will be solely used for research and development in AI, where the university will sign a memorandum of understanding (MoU) with companies and industry partners. Moreover, courses at bachelor's, master's, and PhD levels will also be curated such that

Dhankhar, Yogi confer degrees on students

Vinod Rajput

GREATER NOIDA: Failure in life often comes due to not identifying a problem, accept it and try to look out for a suitable solution, said Uttar Pradesh chief minister Yogi Adityanath on Sunday.

He was addressing the students at Gautam Buddha University campus during the 2nd convocation that saw 794 students being awarded the degrees, including the 282 receiving the doctorates, and 370 foreign students getting other degrees. (does it read factually ok this way?)

Also present on the occasion was Vice-President Jagdeep Dhankhar as the chief guest. It was 2nd convocation for the Gautam Buddha University since being established in 2006. Adityanath highlighted

Vice President Jagdeep Dhankhar and Uttar Pradesh chief minister Yogi Adityanath at the ceremony on Sunday.

He advised to the students that to attain true knowledge of life they will have to step out of their comfort zone or cage. The chief minister said that a varsity could train or teach the student but until they gained a

"We have made our universities like an island with no connection with outer world. Instead, the universities must tie-up with the industries or corporates to teach practical courses instead of condition-

ment and opportunities. "Look at our situation in terms of economy just 10 years back. Now we have taken over the UK and France in terms of economy. Japan and Germany are next in 2030. But these accomplishments will get an edge with quality contribution," said the vice-president.

He also praised Yogi Adityanath, who was also present on the occasion being the chancellor of the university, saying that it amazed him when Adityanath took oath as the chief minister amid a bad law and order in Uttar Pradesh (UP) "as there was despair".

"And now we have come a long way and the UP has become a role model not only in our country but also abroad," he added.

The vice-president said that the CM model is replicated in
