

**GBU School of Biotechnology (SoBT) Signs MOU with Next Gen Life Sciences Pvt Ltd Delhi a Multinational Company (MNC) for Harnessing the Power of Biotechnology for a Sustainable Future**

We are thrilled to announce the signing of a momentous Memorandum of Understanding (MOU) between Gautam Buddha University (GBU) and Next Gen Life Sciences (NGLS) Pvt Ltd. This landmark collaboration brings together the expertise and resources of two visionary entities, paving the way for groundbreaking advancements in the field of biotechnology.

The collaboration between the School of Biotechnology and NGLS will focus on several key areas including research and development, Knowledge Sharing and Technology Transfer. The partnership aims to establish joint research projects to address important challenges in biotechnology. By leveraging the expertise of both organizations, innovative solutions will be developed to enhance various aspects of biotechnological applications.

The MOU will also facilitate the exchange of knowledge and expertise between the university and the industry partner. Researchers, scientists, and experts from NGLS will engage with the faculty and students at Gautam Buddha University, conducting workshops, seminars, and training programs. The collaboration will also create avenues for students to gain practical experience through internships at Next Gen Life Sciences Pvt. Ltd. This industry exposure will not only provide valuable learning opportunities but also enhance their employability upon graduation. The partnership also seeks to explore avenues for commercializing research outcomes and translating scientific advancements into viable products and services. This joint effort will bridge the gap between academia and industry, ensuring that promising research findings have a real-world impact.

NGLS also offered award of Rs. 25000 to the best student of Integrated B.Tech+M.Tech.(Biotechnology) which will be given to the meritorious students after every academic year.
